Shara Tadas

AI Engineer | Generative AI Developer

Pune, Maharashtra

sharatadas26@gmail.com | +91 7709202779 | github.com/Shara26 | linkedin.com/in/shara-tadas-15aba53a3

Professional Summary

Final-year Information Technology student focused on AI Engineering and Generative AI, with hands-on experience building LLM-powered applications and intelligent AI systems. Experienced in Python, LLMs, RAG, embeddings, vector databases, prompt engineering, and API integration. Passionate about developing practical AI solutions for real-world problems.

Education

International Institute of Information Technology 2023–2027
Bachelor of Engineering in Information Technology **CGPA: 9.57/10**

Maloo International School 2022–2023
Higher Secondary Education (12th Grade)

Podar International School 2020–2021
Secondary Education (10th Grade) Percentage: 90%

Skills

Programming Languages:	Python, Java, JavaScript
AI & Generative AI:	LLMs, RAG, Embeddings, Vector Databases, Prompt Engineering, LangChain, LangGraph, Ollama, Groq API
Frontend Development:	HTML, CSS, Bootstrap, React.js
Backend Development:	Node.js, Express.js, REST APIs, JSON
Database:	MongoDB, SQL
Tools & Platforms:	Git, GitHub, Postman

Projects

AI Resume–JD Matcher — ATS Screening System GitHub

- Built an ATS-style resume screening system using Python and LLMs to match candidates with job descriptions.
- Implemented PDF/DOCX parsing, Pydantic structured outputs, and JSON-mode LLM extraction for reliable candidate data.
- Developed a 0–100 match scoring engine with AI-generated strengths, weaknesses, and reasoning.

Technologies: Python, Groq API, LLMs, Pydantic, PDF/DOCX Parsing, JSON

My Own AI — Vector Database & RAG System GitHub

- Built a custom vector database in Python with HNSW, KD-Tree, and Brute-Force search, supporting Cosine, Euclidean, and Manhattan similarity metrics.
- Integrated Ollama embeddings and LLMs to implement a document-based RAG pipeline for semantic search and contextual responses.
- Developed FastAPI REST APIs for vector search, document management, benchmarking, and RAG workflows.

Technologies: Python, NumPy, FastAPI, Ollama, HNSW, KD-Tree, RAG, Embeddings
